Milan / Como, Italy

QUANTITATIVE & ANALYTICS SKILLS

Statistical Learning & Methods

- Econometric Modeling & OLS
- Multivariate Statistics & Clustering
- Time Series Analysis
- Tree-Based Models (XGBoost, RF)
- Supervised / Imbalanced ML
- Model Cross-Validation & Diagnostics

Programming & Computation

- Python (NumPy, Pandas, Scikit-Learn)
- R (Tidyverse, Opta/Stats Analysis)
- SQL (Data Extraction & Hygiene)
- LaTeX (Technical Reporting)

SOFT SKILLS

- Analytical Problem Solving
- Structured Communication & Pitching
- Team Coordination & Synergy
- High-Pressure Execution
- Stakeholder & Client Relations

LANGUAGES

- **Italian**: Native
- **English**: Fluent (Professional Working Proficiency)

ALESSANDRO CASTELLANI

MSc Data Analytics for Business · Quantitative Modeling & Analytics

Mathematics graduate with an MSc in Data Analytics for Business from Università Cattolica. Strong analytical foundation combining pure mathematical rigor, applied econometrics, and statistical machine learning for high-dimensional, complex data environments.

EDUCATION

Università Cattolica del Sacro Cuore
Sep 2025 – Present (Exp. 2027)

Master of Science (Laurea Magistrale) in Data Analytics for Business — Milan, Italy

- Core Curriculum: Applied Linear Models, Algorithms & Deep Learning, Time Series & Spatial Data, Computational Statistics, Optimization Methods, Statistical Learning.

Università degli Studi dell'Insubria
Oct 2020 – Mar 2025

Bachelor of Science (Laurea Triennale) in Mathematics — Como, Italy — **Graduated**

- Final Thesis: *"Reti Neurali per la Previsione di Performance Calcistiche"*. Modeled multi-season historical performance metrics using TensorFlow/Keras neural network architectures with backpropagation and Adam optimization.

Pontificio Collegio Gallio
Sep 2016 – Jun 2020

Liceo Scientifico Internazionale (High School Diploma in Science) — Como, Italy

FEATURED QUANTITATIVE & ANALYTICS PROJECTS

IFCS 2026 Data Challenge
2026

Machine Learning Hackathon (Milan-Bicocca) · Python, Scikit-Learn

- Engineered an ML classification pipeline predicting financial distress across 14,000 Italian SMEs under time constraints, pitching findings to an academic jury.
- Applied non-linear signed logarithmic transformations `sign(x)·ln(1+|x|)` for heavy-tailed balance sheet features, 5-Fold Stratified CV, and Youden's J threshold tuning.

Multi-Horizon XGBoost Prediction Engine & Dashboard
2026

Time-Series Engineering · Python, FastAPI, XGBoost, Plotly

- Built time-series forecasting engine with purged walk-forward cross-validation and embargo buffers to eliminate lookahead bias; deployed REST API with interactive frontend.

Evaluating Offensive Production in Serie A (xG Linear Modeling)
2026

Academic Research (Cattolica) · R, Opta/FBref Event Data, Multiple OLS Regression

- Constructed a multiple OLS regression model on 120 Serie A forwards analyzing xG generation beyond raw shot volume ($R^2 = 91.4\%$, Adj $R^2 = 90.8\%$); conducted tactical outlier diagnostics and validated stability out-of-sample.

PROFESSIONAL EXPERIENCE

Event & Festival Hospitality Staff
Apr 2025 – Present

I Bravi SRL / SC Management SRL — Major Music Festivals (Nameless Festival, Snowland Festival, etc.)

- Delivered high-volume beverage service and guest hospitality at major festivals (20,000+ daily attendees), managing cash handling and POS reconciliation in high-pace environments.

Operations & Front-Office Assistant
Jan 2025 – Feb 2026

XROAD SSDRL (Part-Time) — Cadorago (CO), Italy

- Managed membership renewals, client onboarding, and CRM database records for 200+ members; coordinated daily front-office administrative workflows.

Private Mathematics Tutoring
Sep 2020 – Present

Self-Employed — Milan / Como, Italy

- Mentored 50+ secondary and university students in advanced calculus, linear algebra, and probability theory, translating abstract mathematical formalisms into intuitive analytical frameworks.
